## SUMMARY

---

Information Systems graduate with hands-on experience spanning software engineering, IT support, network infrastructure deployment, and technical leadership. Maintained operational availability for **83 workstations across 3 computing laboratories** and deployed and configured **256 Ruijie wireless access points across 14 campus buildings** as part of a 13-person infrastructure team. Experienced in full-stack web and mobile development, systems analysis, hardware/software troubleshooting, and collaborative Git/GitHub engineering workflows.

## EDUCATION

---

**Universitas Islam Negeri Sultan Syarif Kasim Riau**

*Bachelor of Science in Information Systems – GPA: 3.73 / 4.00*

Sep 2022 – Jun 2026

*Pekanbaru, Riau, Indonesia*

## EXPERIENCE

---

**Head of Software Engineering Division**

*Puzzle Research Data Technology (Predatech)*

Nov 2024 – Dec 2025

*Pekanbaru, Riau, Indonesia*

- Led technical problem-solving sessions and structured systems analysis across multidisciplinary teams, aligning software development activities with project requirements.
- Standardized collaborative version control and code review workflows using **Git and GitHub**, establishing branch management protocols and supporting developers through technical roadblocks.
- Authored technical documentation, system workflow diagrams, and Standard Operating Procedures (SOPs) to streamline knowledge transfer and maintain development consistency.

**Network Infrastructure Deployment Technician**

*Network Infrastructure Team, UIN Sultan Syarif Kasim Riau*

Jun 2024 – Aug 2024

*Pekanbaru, Riau, Indonesia*

- Deployed and configured **256 Ruijie wireless access points across 14 multi-story campus buildings** collaborating within a **13-person infrastructure team**, supporting a large-scale campus WLAN rollout.
- Executed physical infrastructure installation including structured UTP cable pulling, conduit routing, trunking, elevated ceiling mounting, and high-density **RJ45 and patch panel terminations**.
- Conducted systematic LAN/WLAN connectivity and cable continuity testing, diagnosing and resolving cabling faults and link disruptions to ensure network stability prior to handover.

**IT Support & Laboratory Assistant**

*Faculty of Science and Technology, UIN Sultan Syarif Kasim Riau*

Sep 2023 – Jun 2024

*Pekanbaru, Riau, Indonesia*

- Maintained operational readiness for **83 computer workstations across 3 computing laboratories** through preventive diagnostics, corrective maintenance, and hardware fault isolation.
- Standardized laboratory computing environments through clean Windows OS installations and configured academic toolchains, including **VS Code, Cisco Packet Tracer, and XAMPP**.
- Maintained LAN switch connections, patch cabling, and IPv4 configurations while delivering on-site technical support to faculty and students, resolving operating system crashes and software configuration errors.

**Event Project Director**

*The 22nd Information Systems Anniversary, UIN Sultan Syarif Kasim Riau*

Sep 2024 – Nov 2024

*Pekanbaru, Riau, Indonesia*

- Directed operational planning and execution for an institutional event with **500+ participants**, governing **6 cross-functional operational divisions** under strict deadlines and resource constraints.
- Commanded on-site crisis resolution and emergency contingency protocols during live execution, resolving audio-visual technical disruptions, vendor delays, and facility logistics under high pressure.

## TECHNICAL PROJECTS

---

### Bara Kasir – Offline-First Point of Sale (POS) Web Application

2024 – 2025

*Tech: React, Node.js, Express, MySQL, PWA, Service Workers, IndexedDB*

*Full-Stack Web Application*

- Engineered a full-stack retail Point of Sale (POS) system using **React, Node.js, Express, and MySQL** to streamline checkout workflows, catalog management, and automated stock deductions.
- Implemented **Progressive Web App (PWA)** architecture using **Service Workers and IndexedDB**, enabling offline transaction processing and automatic data synchronization upon network reconnection.
- Built secure user authentication, product search, digital receipt generation, and sales summary analytics for operational tracking.

### Penny Path – AI-Integrated Financial Planning Mobile Application

May 2024 – Jul 2024

*Tech: Kotlin, Android SDK, Jetpack Compose, Retrofit, AI/ML APIs, Firebase*

*Capstone Project, Google Bangkit Academy*

- Developed a personal finance Android application in **Kotlin (Android SDK)**, enabling dynamic budget planning, expense tracking, and real-time cash flow analytics.
- Implemented MVVM architecture utilizing **Jetpack Compose, Coroutines, and Retrofit** for structured state management and reliable communication with RESTful APIs.
- Integrated Machine Learning recommendation endpoints into user workflows to deliver automated expense categorization and spending insights based on transaction patterns.

### BinCard Inventory – Warehouse Stock Movement Management System

2024

*Tech: PHP, Laravel, MySQL, JavaScript, Tailwind CSS, RESTful APIs*

*Enterprise Systems Project*

- Digitized physical warehouse bin card tracking into a web system using **PHP, Laravel, and MySQL** to eliminate manual tracking discrepancies and monitor real-time stock movements.
- Designed a normalized relational database schema with foreign key constraints, automated running-balance calculations, and audit trails for inbound receipts and outbound dispatches.
- Implemented Role-Based Access Control (RBAC), minimum stock threshold alerts, and exportable inventory reports to support warehouse inventory control.

## TECHNICAL SKILLS

---

- **Programming Languages:** JavaScript (ES6+), TypeScript, PHP, Kotlin, SQL, Python, HTML5, CSS3.
- **Frontend & Mobile:** React.js, Next.js, Android SDK, Jetpack Compose, Progressive Web Apps (PWA), Service Workers, IndexedDB, Tailwind CSS, Bootstrap.
- **Backend & Database:** Node.js, Express.js, Laravel, RESTful APIs, JSON Web Tokens (JWT), Middleware, Authentication, MySQL, PostgreSQL, Room Database, Firebase Firestore.
- **IT Support & Infrastructure:** Windows OS Deployment, Hardware Diagnostics, Software Troubleshooting, Preventive Maintenance, LAN/WLAN, TCP/IP, UTP Structured Cabling, RJ45 Termination, Ruijie Access Points, Connectivity Testing.
- **Tools & Platforms:** Git, GitHub, Android Studio, Postman, VS Code, Cisco Packet Tracer, XAMPP, Command Prompt (CMD), Vercel, Linux/Windows.

## CERTIFICATIONS & CREDENTIALS

---

- **National Agency for Professional Certification (BNSP):** Certified Junior Web Developer (2025)
- **DBS Foundation & Dicoding Indonesia:** Front-End & Back-End Developer Graduate (2025)
- **Google Bangkit Academy:** Android Learning Path Graduate (Led by Google, GoTo, Traveloka) (2024)
- **DBS Coding Camp Squad:** Campus Representative & Technical Speaker (2025)
- **Academic Practicum & Workshop:** Data Mining Practicum Instructor & Speaker (2025)
- **English Language Proficiency:** TOEFL ITP Certified – Score: 527 (2025)
